Cumulative Editorial Index

Including January 1982 through December 1982. Number preceding hyphen is month of issue; those following are page numbers. Asterisks indicate items appearing in departments. PRODUCTION ENGINEERING is indexed in Applied Science & Technology and the Engineering Index, available in libraries generally. Microfilm copies are available from University Microfilms, 300 N. Zeeb Rd., Ann Arbor, Mich. 48016. Reprints of early issues are available from Johnson Reprint Corp., 111 Fifth Ave., New York, N.Y. 10003.

A

Anderson, J., Machine With Chemistry, 10-46
Appleton, D. S., Handling Data, 9-50
Automotive
1983 Cars, 10-36

B

Bar codes
Bar code selection guidebook, 9-15*
Bar codes-production cost cutters, 4-46
Battersby, M. E., Tax Reductions, 2-34
Beadle, B. R., Machine Motion With PCs, 7-46
Bester, M. H., Money In Your Solder Pot!, 7-52
Boulden, L. L.,
1983 Cars, 10-36
Technology for the Automated Factory, 6-66
Hardware for the Automated Factory, 6-66
Robots Steal the Show, 5-52
Buchholtz, R. F., How To Automate, 9-78

C

CAD/CAM
CAD expected to grow, 2-66
Assembling the automated factory, 6-56
Caprigno, R. A., Standby Power, 8-50
Carson, M., Information On Data Highways, 2-50
Controls
Computer projects in Japan, 4-16*
Lathes run with CNC, 4-68
Mass data storage technique, 6-26*
NC programming aid, 3-8*
Relays in machine controls, 3-64

D

Data highways
Computer network capabilities, 4-16*
Data highway, 2-50*
We need a standard for networks, 6-22*
Deburring technology
Advances in Deburring, 12-44
Deburring With Water, 12-44
Drives
Drives and Controls, 3-46

E

Eckart, G. C., Catch That Ground Fault, 4-54
Education
Careers for the future, 3-8*
Continuing education, 8-8*

G

Gustin II, E. C., News In Laminating, 5-68

H

Hackamack, B. I. and L. C., Replace That Machine, 8-32
Hanssen, G. M., Productivity Gains From The Shopfloor, 3-42
Harrington, H. J.,
Productivity And Quality: 10-20
If Japan Can Do It, Why Can't We?, 11-30
Quality Is The Key To Productivity, 12-26
Hegland, D. E.,
Flexible Manufacturing, 9-11
The Tax Cut and Metalworking, 8-46B
Assembling the Automated Factory, 6-56
The Nonmachining Process, 5-44
Better Tools and Fluids, 4-38
Lathes Run with CNC, 4-68
Low-cost Computer Aided Drafting, 2-66
Stretch Film for the Tough Jobs, 11-57
Electronics Assembly, 11-60
Input/Output Controls, 11-34
Hignett, J. B., Advances In Deburring, 12-44
Hughes, T.,
Materials and Contract Parts, 8-32
Bull's Eye for Digital Inspectors, 7-38
Technology for the Automated Factory, 6-66
Drives and Controls, 3-46
Printed Circuit Making, 3-61
The PC Conference, 2-58
Fluid Power and Transmission Show, 11-51

I

Inspection
Quality for digital inspectors, 7-38

J

Japan
Japan and their software, 8-8*
80's is the robotics decade, 4-8*

Jasany, L., Input/Output Controls, 11-34
Jones, C. C., Relays In Machine Control, 3-64

K

Kivenko, K., QC Cuts Work-In-Process Costs, 4-34
Kleinpeter, J., Reducing Downtime, 9-70

L

Lardner, J. F., Start Today For The Factory Of Tomorrow, 6-50
Leech, A. H., Test Your Metalworking IQ, 9-65
Luftig, E., Making Things Happen, 5-40

M

Machine Tools
Better tools and fluids, 4-38
Manufacturing
1983 Cars, 10-36
Abrasive equipment, 5-72
CAD/CAM, MRP-survival tools, 5-8*
Ceramic manufacturing techniques, 9-10*
Controlled material handling, 8-10*
Creating special machines, 11-42
Find surface flaws beneath scale, 7-15*
Flexible manufacturing, 9-41
Handling data, 9-50
Hardware for the automated factory, 6-66
How to automate, 9-78
Human engineering goals, 5-60
Injection molding, 11-16*
Inplant label printing, 12-36
Machine with chemistry, 10-46
Manufacturing and tool show preview, 4-62
Manufacturing complex ceramics, 9-10*
Manufacturing cost guide, 10-8*
Microbes for metal extraction, 9-10*
Money in your solder pot!, 7-52
New ways to mix compounds, 9-16*
Planning for automatic assembly, 2-40
Planning the automatic factory, 9-48
Positioning in transfer machining, 4-10*
Precision grinding, 3-56
Process strengthens nonalloy steel, 4-15*
Proper stock feeding, 12-53
Technology for the automated factory, 6-66
Materials
Better materials and contract parts, 8-36
Ceramic manufacturing techniques, 9-10*
Chemical milling, 4-15*
Injection molding stainless steels, 6-19*
Plated plastics, 10-60
Reaction injection process, 7-15*
Seize-resistant ball bearings, 9-21*
Welding cast steels, 7-11*
What's ahead in laminating, 5-68
McConnell, C, R., Speak More Effectively, 9-34
McRainey, J. H.,
Part Handling, Flexible Manufacturing, 10-54
Technology for the Automated Factory, 6-66
Manufacturing and Tool Show Preview, 4-62
Design Show Preview, 3-72
New Ideas for Coil Processing, 3-84
Portable Tools, 2-63
Your First Robot, 12-28
Motors
Advanced inside-out motors, 11-16*
Benefits of rewinding, 10-66

N

Napor, C., Creating Special Machines, 11-42
Nauta, R. W., Selection And Lubrication, 7-54
Nontraditional processing
The non-machining processes, 5-44

P

Packaging
Trends in local unitizing, 4-18*
Pallarino, T. F., Inplant Label Printing, 12-36
Parts feeding
Parts feeders cut your costs, 7-58
Parts Handling
Handling and productivity, 4-10*
Part handling, flexible manufacturing, 10-54
Shaped belting for parts handling, 4-15*
Pitzer, R. R., Plated Plastics?, 10-60
Processing
Better welded joints, 3-15*
Eliminate flaws in pressed alloys, 3-18*
Test your metalforming IQ, 9-65
Productivity
Bar codes, production cost cutters, 4-46
Bearing textbook, 5-10*
Catch that ground fault!, 4-54
Concern for productivity, 9-8*
The factory of tomorrow, 6-50
Guidelines for making things happen, 5-40
Human engineering goals, 5-60
If Japan can do it, why can't we?, 11-30
Machine with chemistry, 10-46
Productivity and quality, 10-32
Productivity gains from the shopfloor, 3-42
Racks improve manual order picking, 7-15*
Solutions to wiring problems, 9-82
Reducing downtime, 9-70
Replace that machine, 8-32
Input/output controls, 11-34
Restoring damaged coils, 5-18*
Selection and lubrication, 7-54
Standby power for production, 8-50
Tax reductions, 2-34
Tight fit problems for bearings, 2-15*
Why controls die young, 8-44
Production engineering
1983 Cars, 10-36
Graphic standard support, 10-15*
New diagnostic tools, 9-15*
Planning AS/RS systems, 9-21*
Programmable controllers
Controlling machine motion with PCs, 7-46
Monitoring PCs, 5-15*
The PC conference, 2-58
Small and medium PCs, 3-18*

Q

Quality
The cost of quality computing, 7-32
How QC cuts work-in-process costs, 4-34
Quality can boost productivity, 6-16*
Quality for digital inspections, 7-38

R

Robots
Patents in robotics field, 11-8*
Robots steal the show, 5-52
Your first robot, 12-28
Rodgers, R. C.,
Bar Codes—Automatic Cost Cutters, 4-46
Planning for Automatic Assembly, 2-40

S

Safety
Metal waste decontamination, 10-10*
OSHA procedure changes, 3-15*
Product liability reform, 4-8*
Safety standard for presses, 10-16*
Working with OSHA inspectors, 9-8*
Sargent, E., Precision Grinding, 3-56
Stiers, C. E., Why Controls Die Young, 8-44

T

Taxes
The Tax Cut and Metalworking, 8-48B
Tax Reductions, 2-34
Taylor, A. P., Planning, Automated Factory, 9-48
Technology Trends
Electronics assembly, 11-60
Go metric, 3-8*
A guide to automatic welding, 3-10*
Increase flame efficiency, 2-16*
New ideas for coil processing, 3-84
Portable tools, 2-63
Printed circuit making, 3-81
Proper stock feeding, 12-53
Shelf gives part handling data, 2-15*
Software development tools, 10-15*
Stretch film, 11-57
Technical literacy, 12-8*
Welding techniques, 5-16*
Thompson, L., Relays In Machine Control, 3-64
